

# Earthsongs Gaia Doctrine

## Earthsongs Urgently Demands

Beautiful Biodiversity

Flourishing Forests

Sparkling Skies

Wild Waters

Sacred Economies

These five demands are essential to the flourishing of all life, all people, and all cultures today and into the farthest horizon of time. Earthsongs campaigns, music collective, partners, and creator ecosystem endorse, champion, and actively amplify global-local initiatives moving to urgently protect the wild earth, restore ecosystems, and honor Indigenous Wisdom.

The health and well-being of life on earth is the greatest inclusivity issue of all time. Every living person, including all of the peoples from the more-than-human world, have an inherent right to participate in this moment. The rights of nature to participate in the future of Earth are as important as human rights. Regeneration is inclusivity, diversity, and interdependence with the more-than-human world.

*Earthsongs Gaia Doctrine* recognizes that humans have created a whole earth emergency, *The Metacrisis*, and it is harming and endangering all species, all people, and all cultures. We agree with the Earth Elders, this is a **Code Red moment for Nature**.

The Metacrisis is a Code Red emergency for humanity. The Metacrisis is complex, chaotic, and profoundly urgent. Industrial modern [sic] economies rooted in empire and supremacy have degraded Mother Earth and Her Peoples to exhaustion. Plastic pollutes all water, our food supplies, and our bodies. Mass

extinction is happening. Biodiversity is disappearing. Indigenous Wisdom, Cultures, and Ecosystem Knowledge is disappearing. Forests are disappearing. Coral Reefs are disappearing. Marine animals are disappearing. Bees and insects, frogs and amphibians, are disappearing.

Global loss of top soil threatens agriculture and food supply. Extremely toxic forever chemicals (per-and polyfluoroalkyl substances) pollute our skies, soils, waters, food, and bodies. Humanity has exceeded six out of nine Planetary Boundaries. Meaninglessness is fragmenting humanity.

For many, choosing to support regenerative brands is the most direct and meaningful way to participate in this movement. Earthsongs supports the regenerative business community and the emergence of convivial life-centered beauty-making economies.

*Earthsongs Gaia Doctrine* recognizes the sacred flourishing of the wild earth, all species and all life, all people, and all cultures today, and into the farthest horizon of time, is the essence of sacred economies and the heart of regeneration philosophy, design principles, businesses, and lifestyles.

*Earthsongs Gaia Doctrine* recognizes that each living human being has sacred individual agency to participate in the regeneration movement through purpose, identity, beliefs, relationships, choices, and actions. People express agency in diverse ways. All ways are good ways! Each person's path to regeneration is unique; regeneration can't be standardized. Regeneration is a way of life and living. Everyone that wants to participate needs to be welcome. Everyone is necessary. Every regenerative action matters.

*Earthsongs Gaia Doctrine* recognizes that sacred economies are rooted in reciprocity and reverent kinship with the natural world. Honoring the preciousness of each person's time, consciousness, and life force energy, sacred economies value gratitude, courtesy, gift giving, and noble purpose. Sacred economies affirm life. They grow vitality and well-being. Sacred economies are like forests and oceans and savannas. They are beautiful and abundant. Sacred economies are convivial and bound by the natural scale and limit of place.

*Earthsongs Gaia Doctrine* recognizes that the many fold paths to regenerative futures requires all of the unique ways each of us can be the change. For many people, choosing to support regenerative brands is the most direct and meaningful way to participate in this movement. But beyond that, growing sacred economies is the essence expression of the Regeneration Movement. When human economies grow beauty just like a rainforest, that is how we will know that we have arrived at Destination Regeneration.

Beautiful Mother Earth is not a resource – and neither are people. She is not a capital stock or a resource. Regenerative business have to lead with reciprocity to care for the earth, care for people, and reinvest surplus and bounty to care for earth and people. This is new way of thinking for modern people; this is the sophisticated original way of thinking for Indigenous Cultures. Permaculture design says that the problem is the solution. If the problem has been businesses connected to industrial economies degenerating life, the solution can be businesses connected to sacred economies regenerating life. Business can grow life and make beauty the way.
